REPORT

The Department of Environmental Science and Department of Chemistry Sao Chang College, organized a joint activity under the theme “Project Zero” at Mount Carmel School, Tuensang on 2nd November 2024. The main aim of this activity was to give awareness about the non-biodegradable products. The participants were enlightened on Segregation of waste and Composting for a sustainable future. The activity was based on a competition for student from class 8 to 10 to make a model out of waste materials and were made to present on the model.

The participants were appraised about the different types of solid waste, its affect on health and environment and solid waste management. They were taught about the purpose of segregation of waste and how to identify waste and the significance of coloured dustbins.

A total of 13 students (6 students from 8th standard, 1 student from 9th standard and 6 students from 10th standard) presented their model. They were judged based on their model and presentation. Cash prizes of ₹1000 (1st position), ₹700 (2nd position) and ₹500 (3rd position) was given to the winners.

The winners were:

1st position – Sangle L Chang, Class -10

2nd position – Woniu, Class – 10

3rd position – Keshen, Class – 9

A total of 54 participants attended the program along with 4 students from our college.
