REPORT

A Field Study to Aüching Village, Longleng, Nagaland

Dated: **25th March 2024**

Venue: **Aüching Village, Longleng**

Organised by: **Department of Environmental Science**

Description of the activity:

The Department of Environmental Science, Sao Chang College successfully conducted a Field Study in Aüching Village, Longleng, in collaboration with LEMSACHENLOK Nagaland.

The study topic was 'Community participation in Biodiversity conservation and Livelihood enhancement'.

178 students including 4 faculties (Ms Rangbenkumla Chang, Dr Limamanen Phom, Ms K Vidila Jing, Dr Soyimla Akum) from Sao Chang College, Team members of LEMSACHENLOK and leaders from Aüching village participated.

Speaking to the students, resource person Dr. Y Nuklu Phom (Team Leader, LEMSACHENLOK) emphasized on the importance of sustainability in any venture. He highlighted the MODELS they employ in their intervention on Biodiversity conservation and Livelihood enhancement measures through Community involvement.

On effective community participation, he also emphasized on Identifying resources, Managing the resources, Sustaining the resources (which he calls IMS Model) that serve as strong basis for the sustainable development activities.

We express our profound gratitude to Leaders of Aüching village and LEMSACHENLOK Team for sharing their knowledge.

We also thank the 3rd NAP, IR 9th Coy, ITI, DEF for generously providing us their buses which made this field trip possible.
