REPORT

The Department of Environmental Science, Sao Chang College, Tuensang, commemorated the International Day for Biological Diversity on 22nd May 2025 by organizing a special competition titled “*Sustainable Crafts: Creating with Care*” at Mount Carmel School, Tuensang. The programme was designed to raise awareness about biodiversity conservation and to promote environmentally responsible practices among young students.

During the event, participants were introduced to the global theme, “*Harmony with Nature and Sustainable Development*,” and were guided on how creativity can play a role in protecting the environment. The significance of sustainable living, conservation of natural resources, and the importance of reducing waste were explained in an engaging and interactive manner.

The competition encouraged students to express their ideas through innovative craftwork using eco-friendly and locally available materials such as bamboo, recycled paper, jute, leaves, and other biodegradable items. A total of 21 students from Classes 8 to 10 actively participated in the event, demonstrating enthusiasm, creativity, and environmental awareness.

The crafted items reflected not only artistic skills but also meaningful messages on sustainability, conservation, and respect for nature. The event also helped students understand the value of reusing materials and minimizing environmental impact through simple, creative actions.

Overall, the programme was successful in fostering environmental consciousness, enhancing creativity, and inspiring students to adopt sustainable practices in their daily lives.

Lay out of the Program:

- Presentation of Models
 - Talk on the theme
- Announcement of winners
 - Spare time
 - Vote of thanks
