Report on: WORLD ENVIRONMENT DAY 2023

Joining the global event, the World Environment Day 2023 was observed at GMS Chendang village Tuensang, organised by the Dept. of Environmental Science and the Dept. of Zoology, Sao Chang College, Tuensang.

As an extension service, the event was marked by conducting a Seminar on Solution to Plastic Pollution, with participants from School Management Committee and School Parents association and also conducting a Plantation drive.

Title of the program: *"Solutions to Plastic Pollution"*

Date: 05th June 2023

Objective: Addressing the issues of Plastic Pollution and Environmental Degradation.

Description:

The extension program was held at GMS Chendang village, Tuensang.

A seminar was organized for members of the School Management Committee (SMC) and the Parents' Association, centered around the theme "Solution to Plastic Pollution." The event, conducted in the local dialect, featured Ms. Rangbenkumla Chang, Assistant Professor in the Department of Environmental Science at Sao Chang College. She emphasized the need to reduce reliance on plastic materials in our daily lives and highlighted the importance of efficient waste management to foster a clean and hygienic environment at the village level.

In the second session, Ms. Vidila Jing, Assistant Professor in the Department of Zoology at Sao Chang College, underscored the significance of tree planting and the responsibility of acting as stewards of God's creation. Collaborating with B.Sc. students, she led a plantation drive activity for school students. Noteworthy contributions were made by Sir Alemwapang ACF (DFO Longleng), who generously provided plantation saplings, and the Yingli Mission Society Nagaland, which partly sponsored the event.

Outcome:

During the event, the School Management Committee, Parents, and Students gained insights into the significance of discouraging the use of plastic carry bags and related materials. The session emphasized the prolonged decomposition period of plastic and its detrimental effects on the ecosystem. Additionally, the seminar delved into the health consequences of using plastic products, shedding light on key issues arising from water and air pollution. The discussion also explored innovative approaches for material reuse and recycling. Notably, the occasion saw the planting of around 40 saplings, including water-retention, fruit-bearing, and ornamental trees.

Village under mon district. The objective of the team is to give a voluntary helping hand to the poor and the needy. The team has been initiating plantation drive and has organized other social activities since its inception in 2021.

GMS Chendang: WED was observed at GMS Chendang village Tuensang, organised by Department of Environmental Science and Department of Zoology, Sao Chang College (SCC).

The event was marked by a seminar on 'Solution to Plastic Pollution', with 40 participants from School Management Committee and School Parents association. Rangbenkumla Chang, Asst Professor, Dept of Environmental Science, SCC spoke on the theme while Vidilajing, Asst. Professor, Dept of Zoology, SCC led the plantation drive where 50 students participated. It may be noted that Alemwapang ACF (DFO Longleng) provided the saplings and Yingli Mission Society Nagaland partly sponsored the event.

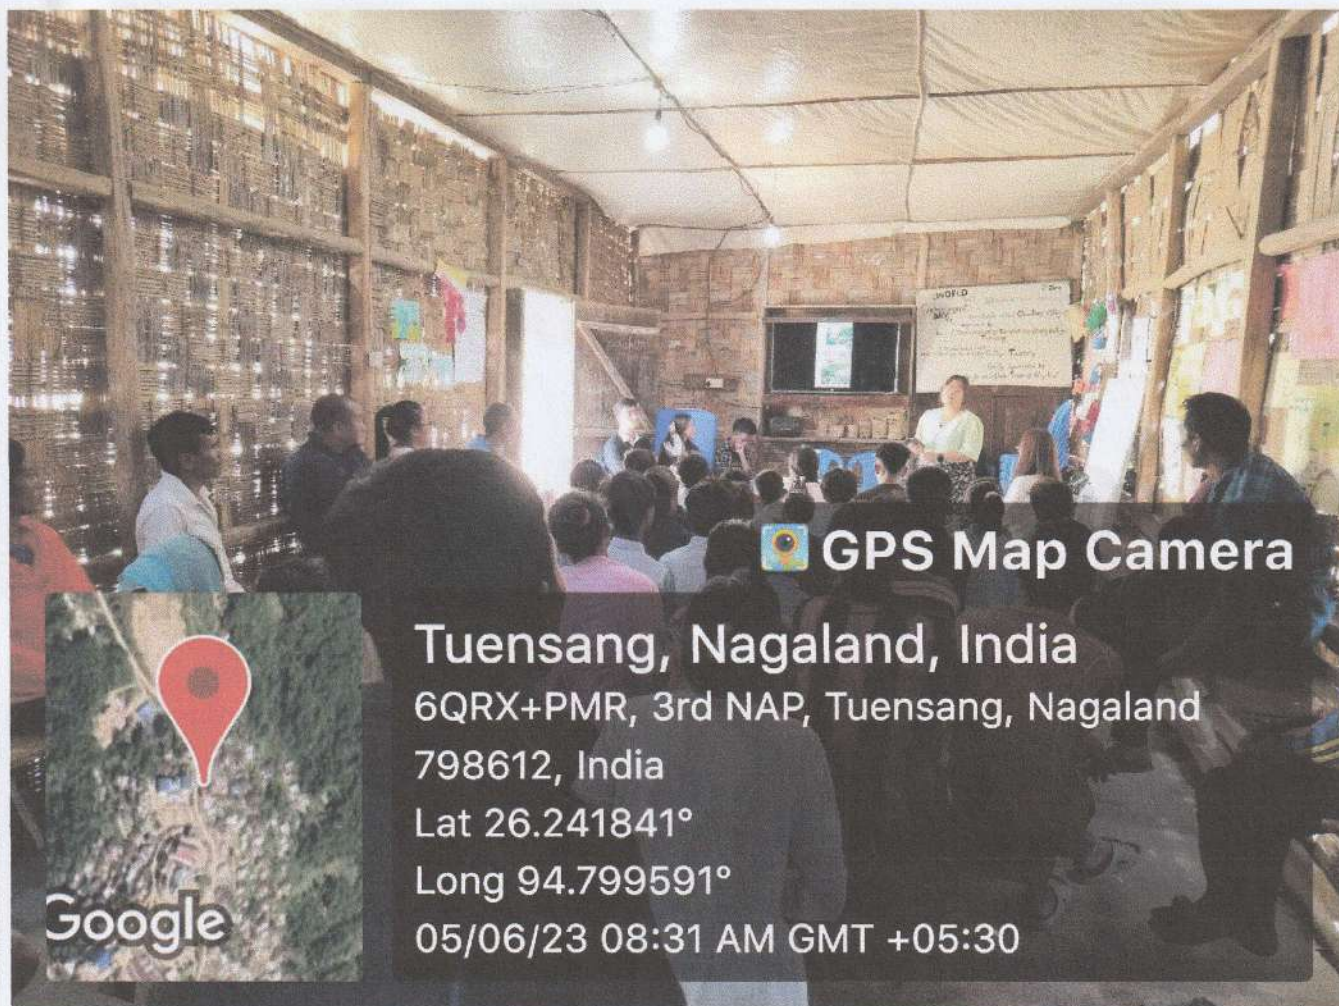

GMS Pungro Village: WED was observed at GMS Pungro Village with members from WATSAN, SHG, VC, Church and SMC.
